Speaker's Profile

(H.N. Teodorescu Profiling Form, v. 002b, 21 March 2006. Copyright 1996-2006 © H.N. Teodorescu)

Any speaker should be given the full and unconditional rights **NOT** to answer specific questions at his discretion. For example, some people are not willing to provide information on ethnicity, or on their mother education etc.

1. General

Recruited by: HNT			
Form completed by:	.10031	Date	14.07.2008.
Signature:			
Informed consent given YES/N	NO and date of signatur	e14.07.2008	
(Consent attached)			
Sex: F/M			
Age bin: 0-1 / 1-3 / 3-5 / 5-10	0 / 10-14 /14 – 16 / 16	5-20 / 20-25 / 25-30/	30-40 / 40-50 / 50-

2. Linguistic data

Native language: Romanian

Mother's native language: Romanian Father's native language: Romanian Country (born in ~): Romania

60 / 60-70 / 70-75 / 75-80 / 80+

ID (5 numbers or letters + numbers): 10031

Major region where subject was born: Moldova (Eastern Romania)

Major region where childhood (1-7 year old) has been spent: Moldova (Eastern Romania)

Major region of elementary school: Moldova (Eastern Romania) Sub-region of elementary school: Central-Eastern part of Moldova

Major dialect according to the speaker: MOLDAVIAN

Major dialect according to the experts

- Opinion Expert #1 (H.N. Teodorescu):
- Opinion Expert #2 (D. Trandabat)
- Opinion Expert #3

Other languages known (well spoken languages only) englis

Vocabulary amplitude (richness)

Written language proficiency

- poet, drama or novel author
- professional writer, journalist
- scientist, teacher
- intellectual writer
- other

3. Ethnic data

Speaker's ethnicity ROMANIAN

4. Educational, professional and professional voice profile

Education profile: only elementary / high school / higher education / Master degree / Dr.

Specialty: Domain ELECTRONIC ENGINEERING

Specialty: Sub-domain ELECTRONIC

Professional voice YES/NO

For how long a professional voice: -

Employment (no company name, only branch of the employer!) -

Function (no precise function, only type of function, e.g.: teacher, manager etc.) -

Voice strain: not strained / seldom / frequently

Experience with speaking to children -

Experience with speaking to specific social groups (name the group, e.g. speech disabled, motor disability etc.) -

Voice training:

- as a didactical profession
- as a politician speaker
- as a public relation speaker
- as a radio or TV journalist
- as a dramatic artist
- as an amateur singer
- as a professional singer

5. Physiological and pathological data

Height 1.82 Weight 60

Known laryngeal information

Known buccal information

Any other physiological information

Smoker Y/N and average number of cigarettes per day

Pathology (chronic AND acute):

- respiratory
- laryngeal
- buccal
- nasal
- facial (paresis)
- neurological
- gastric reflux

6. Subjective assessment of voice quality (also related to Section 4)

Voice education exceptional

```
high
```

average

below average

low

virtually not educated

Subjective Quality

Rough

Nasal

Highly nasal

Small

Strong

Plain

Rounded vowels

Slow [taraganata]

Quick (high debit)

Emotional

Sweet

Specific pronunciation of sounds (e.g., aspirated h; highly liquid l, vibrating r)

Other:

8. Objective measurements of the voice

- Highest and lowest frequencies in the voice
- Average spectra of the phonemes
- F0 (pitch) range; statistics of the pitch, either determined on the voice signal, on the impedance signal (glottal impedancemetry), or by direct visualization
- Jitter, (instability in frequency; measured by the RAP index)
- Shimmer (instability in amplitude; measured by the APQ index)
- Signal to noise ratio (SNR)
- NNE index, i.e. normalized noise energy
- Harmonics to Noise Ratio, HNR,
- Glottal to Noise Excitation Ratio (GNE)
- Cepstrum peak
- Softest intensity of the voice (as measured in dB A dB on the A scale, with the microphone at 30 cm from the mouse, while pronouncing an "a")
- Roughness, defined as the existence of subharmonics at $(2n-1)F_0/2$, where F_0 is the pitch, n = 1, 2,...
